# NEXT GENERATION NFT MARKETPLACE

## EXECUTIVE SUMMARY

NFT stands for 'non-fungible token and represents a unit of data stored on a blockchain. Unlike Bitcoin and other cryptocurrencies, each token here certifies that a digital asset is one of a kind and therefore cannot be replaced with anything else. The NFT concept is a perfect fit for crypto industry. NFT not only expands its boundaries but also changes the equity distribution model of sports assets. Veoven has identified early and is trail blazing the market with its NFT-solution. Veoven has developed a blockchain-based NFT platform where users can Create, buy, sell, swap, and leverage non-fungible tokens across a range of different blockchains with Veoven. Unlike other NFT ecosystems, the Veoven NFT platform will be operated by smart contracts. This Whitepaper lays out the business model, technical foundations, and economic mechanisms of Veoven

## VEOVEN TOKEN

Veoven is a NFT token Built on the binance smart chain system that creates a favorable platform wher users can mint, buy and sell NFT. The token is Deflationary on Every swap made. Token Holders also can stake their VEN token on our NFT launchpad to earn staking rewards. The rewards are withdrawable anytime.

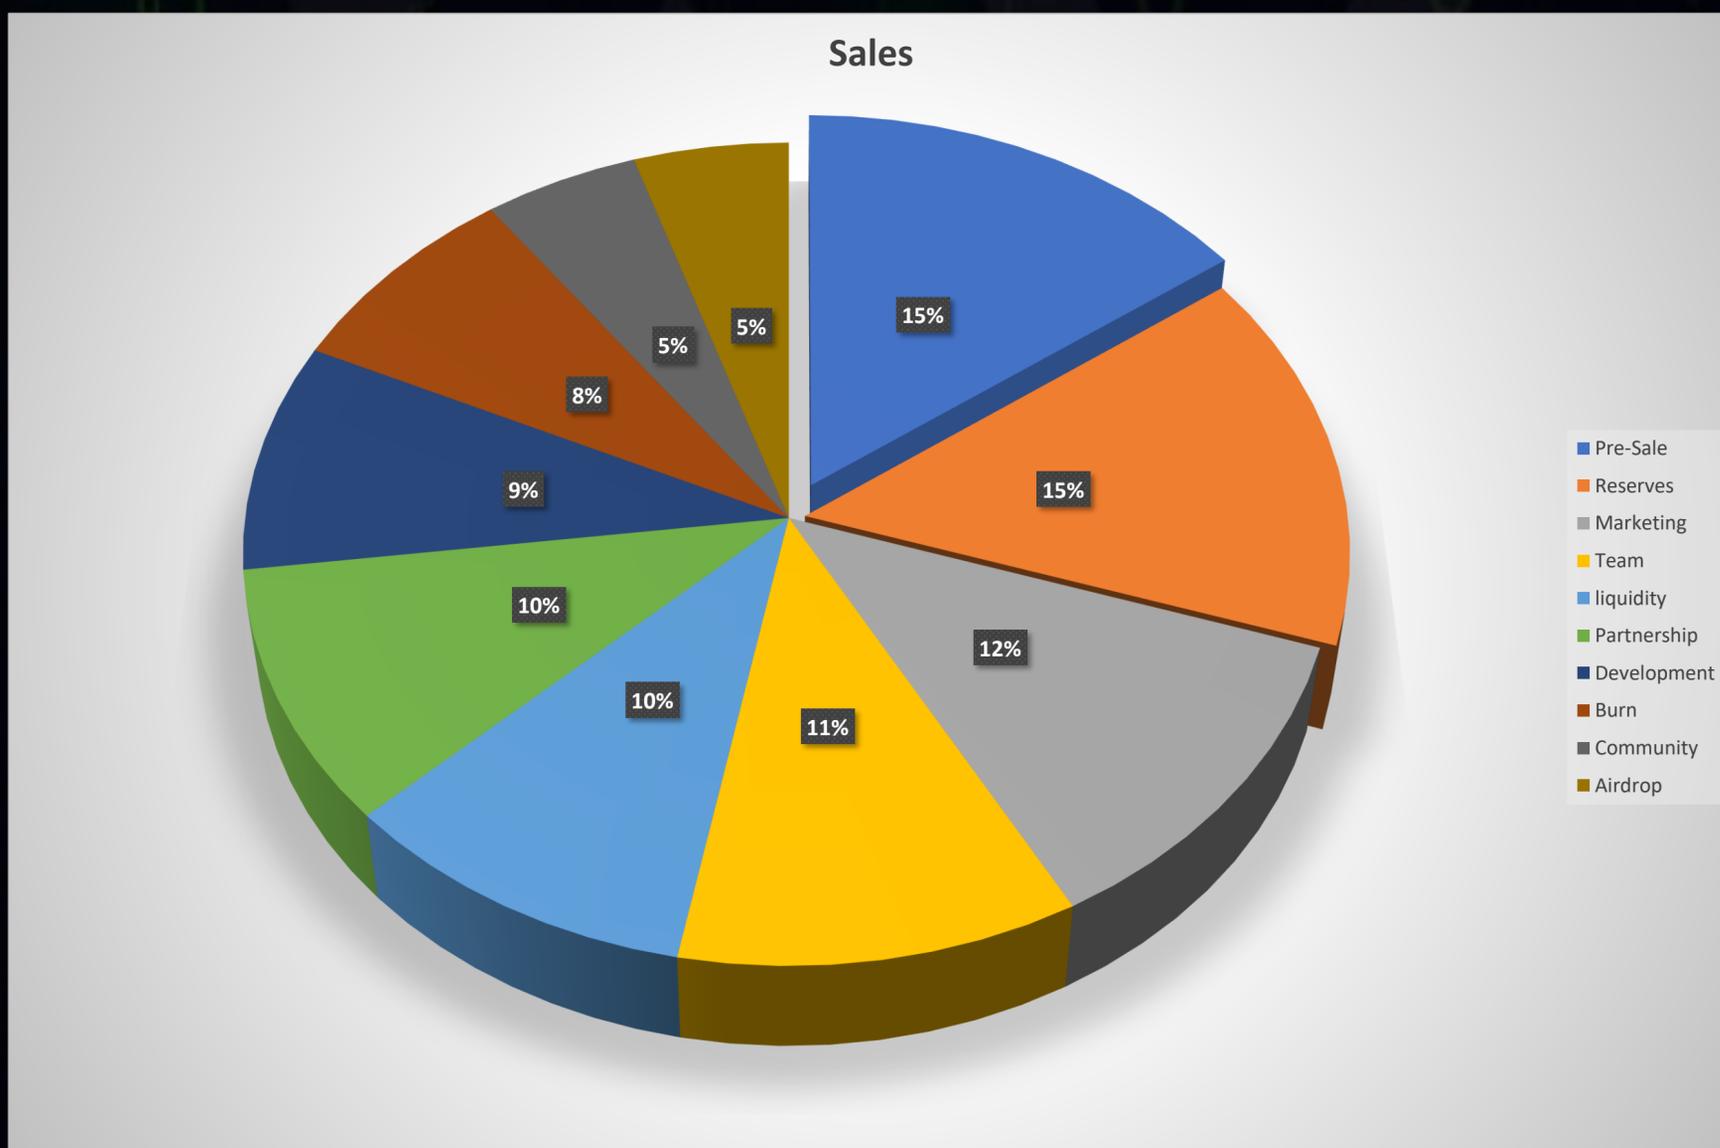

Veoven will feature a decentralized platform that is focused on cross-chain and multi-chain, it will as well feature an nft market aggregator which helps you buy multiple nfts in single transaction. This in turn helps you save a significant amount of fees in the gas fee which is pretty good.

The Veoven platform ill also an escrow p2p pltfm which gives you the ability to trade without the necessity of an intermediary, which was previously impossible through the online realm before the introduction of blockchain technology. Now, anyone can conduct transactions with whomever they wish, all through a fluid trading process that only involves the parties within the trade. With swaps, this is done off-chain with no transaction fee, making the trade as seamless and easy to execute as possible.

The Veoven will focus on building these three primary functions as part of the first phase. Our mission is to simplify the minting, buying and selling NFT process between people around.

## TOKENOMICS

Tokenomics is extremely important and we are convinced that with the help of proper initial distribution and additional regulations on corporate tokens we will overcome this difficulty. We assure all investors that the Veoven team will always act ethically, and our goal is to manage and continue the project, which will bring tangible benefits to any person with Veoven tokens.
